Summary

Highly motivated Software Engineer, **with a background in support engineering and system administration**, who obtained good knowledge and experience in Java programming, including such additional skills as resolving product or service problems, determining the cause of the problem, diagnosis of non-obvious problems and finding solutions for solving them. In total I have 10+ years in IT, have strong knowledge of OOP, Java Core, Java 8, and have worked mainly with JDBC, Hibernate, MySQL, PostgreSQL, Spring, Maven, Git, Docker, Kubernetes, Oracle ATG, etc. Also, I am well familiar with the Linux server administration and learning AWS development now.

I am comfortable to talk to, as well as I can easily find common ground with anybody. Becoming a part of any team, I would like to bring benefits in solving business problems. I can prove myself as an accurate, hard-working and reliable team member

Technical skills

- OOP, Design patterns
- SOLID, KISS and DRY principles
- Java Core, Java 8, Servlets, JSP, JSTL, Tomcat, JDBC, Log4j
- Hibernate, JPA, JUnit, Spring MVC/Security/Boot
- SQL basic knowledge (MySQL, SQLite, PostgreSQL)
- Web basic knowledge (HTML, CSS, Bootstrap)
- Git, Maven
- Linux: ssh, iptables, LAMP, OpenVPN Server

Projects

Project name: Finpulse startup
Functional descriptions: Back-End REST application for displaying financial macro indicators of a company. Integration with 1C Enterprise, data processing and transferring them to UI.
Technologies used: Hibernate, Postgresql, Spring Boot, Spring Security, Jackson API, Log4J, Docker

Project name: Cinema online booking
Link: <https://github.com/aborozdykh/cinema>
Functional descriptions: Cinema is an application for purchasing tickets to the cinema
Technologies used: Hibernate, MySQL, Spring Security, Jackson API, Log4J

Project name: Internet Shop
Link: <https://github.com/aborozdykh/internet-shop>
Functional descriptions: Application with basic operations for the e-shop.
Technologies used: JDBC, MySQL, Servlet API, JSP, JSTL, Log4J

Project name: Amazon Review Application
Link: <https://github.com/aborozdykh/amazon-review>
Functional descriptions: Application for parsing csv file with reviews and adding them to DB
Technologies used: SpringBoot, SpringSecurity, JWT, H2, Docker

Education

Igor Sikorsky Kyiv Polytechnic Institute
Faculty of Informatics and Computer Science
Department of Computer-Aided Management and Data Processing Systems

Master's degree, Computer system analyst

Bachelor of Computer Science

Self Education

Books:

- Thinking in Java by Bruce Eckel
- Grokking Algorithms by Aditya Y. Bhargava

Algorithmic tasks:

- Codewars (Java, SQL)
4 level, honor percentile 10,83 % (better than 89,17% of rest users), 150+ solved tasks

Work experience

EPAM Under NDA
Feb 2021 - present
Kyiv, Ukraine
Java Software Engineer

Finpulse startup
Oct 2020 - Jan 2021
Kyiv, Ukraine
Java Software Engineer

Development and design of the BackEnd.

Calivita Ukraine
Jan 2020 - Jan 2021
Kyiv, Ukraine
Java Software Engineer

Support of a Java application, composing SQL requests.
Part time job

LifeJoy
May 2013 - Dec 2019
Kyiv, Ukraine
